

Program Process

During an open application period, complete and submit a Home Repair Program application. Holston Habitat staff will process your application and complete a home visit to verify the repairs needed and gauge the scope of work. You will be contacted regarding whether your application has been approved.

If approved for the Home Repair Program, you will meet with Holston Habitat staff prior to work beginning on your home to complete a Pre-Work Agreement Form outlining the scope of work to be completed, program fee owed, and your other partnership responsibilities. Your full repair program fee and half of your required sweat equity (4 hours) are due before work on your home begins. Holston Habitat staff will determine your home's specific repair schedule as part of a larger, program-wide repair calendar. Depending on how quickly your fees are paid, the level of need your repairs are assigned, and the availability of subs and/or volunteers, it could take 3-12 months for repair work on your home to be completed.

Once work on your home is done, Holston Habitat staff will meet with you to take photographs and sign the Post-Work Completion Form, confirming that our commitment to you has been met.
